

Gutters of PEPSI Factory – SIBCO – Jeddah, Kingdom of SAUDI ARABIA

The **SIBCO Mega Plant** (Second Industrial City) is in the south of Jeddah, very close to the Red Sea shores.

In 2016 the **ZINGA** Distributor of Saudi Arabia, **B.P.C. (Building Products Cy.)**, succeeded to get the contract for the refurbishing of all the gutters of the **PEPSI** Factory for the client **S.A.C.C. (Saudi Arabian Construction Cy.)**.

These gutters were galvanized but started to corrode 2 years after the installation of the **PEPSICO** Factory.

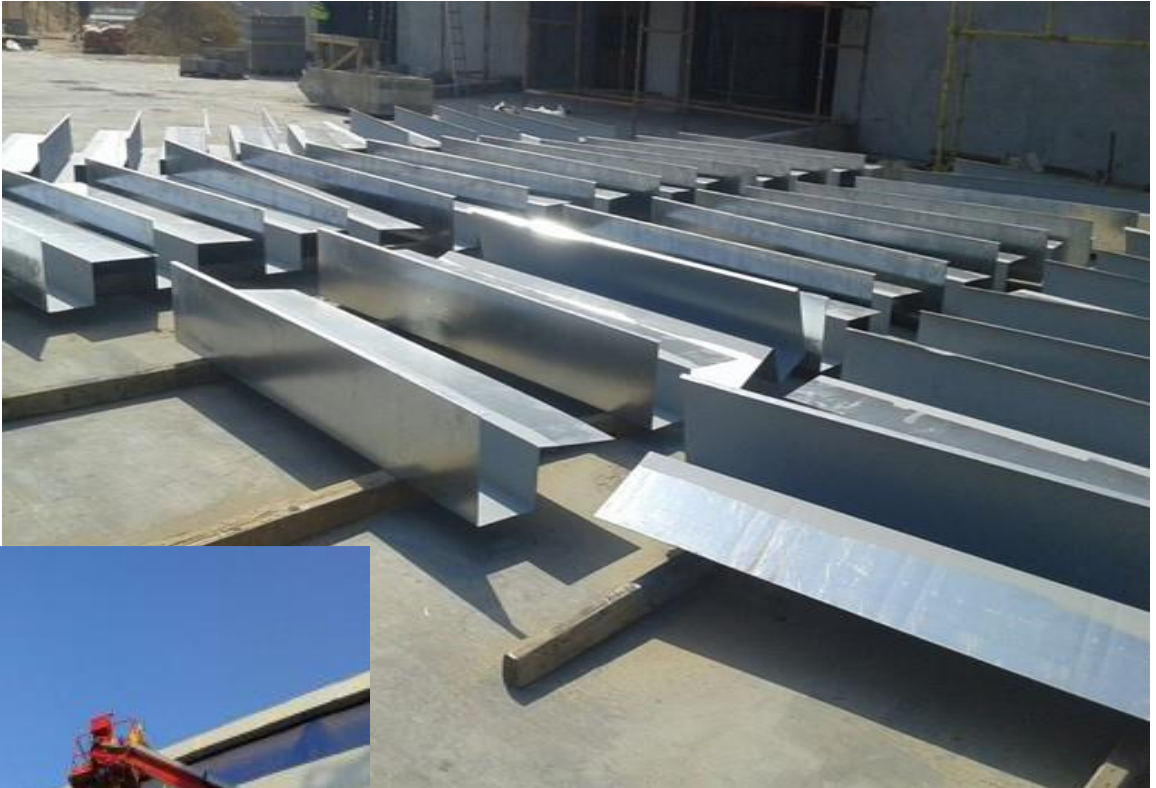

ZINGA had been previously tested by the client during 3 months before getting approved.

After a thorough pre-treatment, the existing gutters were protected with **ZINGA**.

Some gutters were also replaced by new ones and protected with a **ZINGA** stand-alone system.

Condition before surface preparation

System:
Surface preparation:
High pressure fresh water jetting,
Sweep / full blasting.
ZINGA 2 x 60 µm DFT
