AL AHLIA Hotel laundry machines – Amman, Jordan

The **Mövenpick Hotel** in Amman, Jordan, had some corrosion problems inside their big laundry machines. They first wanted to re-galvanize them.

As the Hotel Management did not want to dismantle and take out all the laundry machine parts, their hotel equipment supplier, **AL AHLIA Hotel Supplies Co.** together with the **ZINGA** Jordan Distributor, **INNOVATOR FOR TECHNICAL SOLUTIONS**, proposed to use **ZINGA** as stand-alone system.

After some tests in high temperature and water, they approved it, and the works were done on site by a local professional car painter, in November 2023.

For the client it meant a great time saving as the surface preparation and the **ZINGA** application works were done in less than 2 days.

System:

Surface preparation:

Sanding the surface

Cleaning by wiping with metal conditioner

Dry for 24 hours

ZINGA 2 x 60 µm DFT (by airless spray – 2nd coat after 4h)
