Wulai Hydro Power Plant – Taipower - Taiwan

The Wulai Hydro Power Plant, owned by TAIPOWER, is located in the North of Taiwan.

The steel structures were starting to corrode and needed urgent repairs.

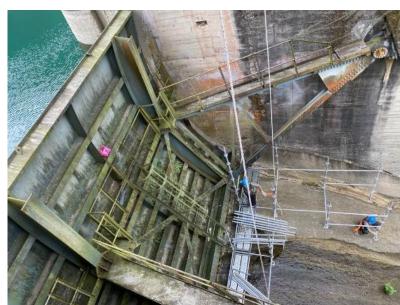

By end of 2020, **ENVIROLINK CORPORATION**, the **Taiwanese ZINGA Distributor**, received the order to totally refurbish the steel structures of this power plant with the **ZINGA** stand-alone system. The surface preparation works started in April 2021, but were stopped during the flood control period, and finally delivered in February 2022.
